SUMMARY

- Full-stack developer skilled in JavaScript, React.js, Node.js, and scalable API design. Experienced in real-time communication systems, async event-driven workflows, and AI-powered features. Strong in microservices, distributed systems, and optimized database architectures for reliable, high-performance applications.

EDUCATION

- **Indian Institute of Information Technology, Allahabad** Allahabad, India
M.Tech in Information Technology (Software Engineering Specialization); CGPA: 8.43 / 10 Aug 2024 – Present
- **Institute of Technology & Management, Gorakhpur** Gorakhpur, India
B.Tech in Information Technology; CGPA: 7.76 / 10 May 2019 – Jun 2023

PROJECTS

- **DevLinker** — [🔗 Live](#) | [GitHub](#) AI-powered developer referral and real-time collaboration platform.
 - **Tech Stack:** React, Node.js, Express, MongoDB, Socket.IO, Redux, JWT, FastAPI, SentenceTransformer.
 - Built a secure MERN application with JWT auth, onboarding **100+ active users**.
 - Engineered real-time chat using Socket.IO with sub-**200ms** latency and full persistence.
 - Developed a FastAPI + SentenceTransformer microservice generating **500+ profile embeddings**.
 - Boosted feed performance by **70%** using indexed queries, pagination, and optimized pipelines.
 - Deployed modular services on Render and HuggingFace for independent scaling and fault isolation.
 - Designed async workflows for embedding generation and response handling under load.
- **Speech Emotion Recognition** — [GitHub](#) End-to-end ML pipeline for emotion classification from audio.
 - **Tech Stack:** Python, Librosa, NumPy, Scikit-learn.
 - Built preprocessing pipeline extracting **180+ audio features** (MFCC, Chroma, Mel-Spectrogram).
 - Achieved **93% accuracy** and **90% F1-score** on a **1.2k-sample** dataset using a tuned SVM.
 - Evaluated model performance using a **confusion matrix** to analyze class-wise prediction accuracy.

WORK EXPERIENCE

- **Prakhar Goonj Publications** Remote
Backend Development Intern | [📜 Certificate](#) Jun 2023 – Dec 2023
 - **Tech Stack:** Node.js, Express.js, MongoDB, JWT, bcrypt, Postman.
 - Developed **10+ REST APIs** for catalog, order, and author workflows, automating **80%** of backend tasks.
 - Implemented secure JWT auth and bcrypt hashing for reliable access control and data integrity.
 - Created automated Postman test suites covering **100%** endpoints, reducing regression time by **35%**.
 - Enhanced API reliability with validation middleware and modular controllers, reducing downtime by **30%**.

TECHNICAL SKILLS

- **Languages:** C++, Python, JavaScript (ES6+), TypeScript, SQL, C
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Redux, Socket.IO, FastAPI
- **AI / ML:** Scikit-learn, NumPy, Pandas, SentenceTransformers
- **Developer Tools:** Git, GitHub, Postman, Docker (basic), Render, HuggingFace
- **Core Concepts:** Data Structures & Algorithms, OOP, OS, DBMS, Computer Networks, REST APIs, Microservices

ACHIEVEMENTS

- Solved **500+ DSA problems** on LeetCode and GeeksforGeeks; ranked in the **top 10%** of weekly contests.
- Secured **AIR 2917 (GATE CSE 2024)** among **1.23L+ candidates (Top 2.4% nationwide)**.
- Led a **6-member technical team** at Parampara Fest 2021–22, automating registration workflows.
